YOUR CHOICE: ENCLOSED COCKPIT (or) INFINITY DECK!

Specifications

Engines: Twin Volvo D6 480hp
LOA: 56’ 3”
Beam: 15’ 6”
Dry Weight: 42,000 lbs

Draft: 3’2”
Air Draft: 13’ 6”
Fuel: 550 gal
Water: 200 gal

Cruising Speed Range 17-22 knots
Range 1000+ at 8 knots

The Outback Life

Effortlessly versatile—perfect for an adventurous couple or a lively crowd of family and friends.

The innovatively designed Infinity Deck offers expansive space for guests, gear, and every kind of on-the-water fun.

Spend the day on the water, relaxing out-back with the whole crew and enjoying endless fun.

A spacious foredeck hangout with great views in every direction.

Comfortable salon and convertible dining & lounge area.

Design Brief

- **Pedigree:** Designed by renowned naval architect Michael Peters, whose portfolio includes Viking, Bertram, Hinckley, Valhalla, and projects for the U.S. Navy. Peters himself notes, “This boat comes closest to the boat I’d actually want for myself.”
- **Versatile Mission Profile:** Equally at home on day trips, weekend escapes, or extended offshore cruising.
- **Unmatched Deck Space:** Delivers more usable outdoor area than any yacht in its class—ideal for lounging, entertaining, and carrying gear.
- **Shallow Draft (3’2”):** Accesses skinny-water destinations, private anchorages, the Bahamas, and the full Great Loop with ease.
- **Direct-Drive Efficiency:** Advanced prop-pocket design provides excellent economy and reliability without the complexity of pod systems.
- **Effortless Engine Access:** Open, obstruction-free machinery spaces make daily checks and routine maintenance simple.
- **Modern, Low-Maintenance Interiors:** Clean, contemporary materials and layouts designed for comfort and easy upkeep.
- **Flexible Accommodations:** Offered in 2 or 3 stateroom configurations to suit couples, families, or guest-forward cruising.
- **Confident Performance:** Comfortable cruise speeds in the 17–22 knot range.
- **Fuel-Efficient Hull Form:** Purpose-engineered for long-range economy and low operating costs.
- **Signature Infinity Deck:** Open transom with removable safety rail transforms the cockpit into a seamless, water-level “infinity deck.”

Efficiency & Performance

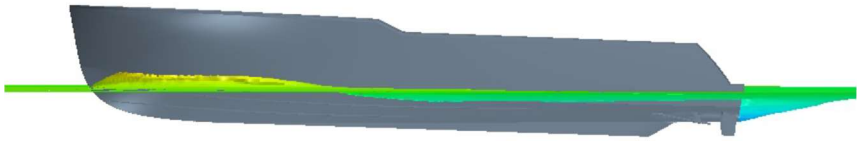

Michael Peters' Design Philosophy was to engineer the Outback 50 around one core objective: maximize efficiency and ride quality through an almost perfectly optimized hull form.

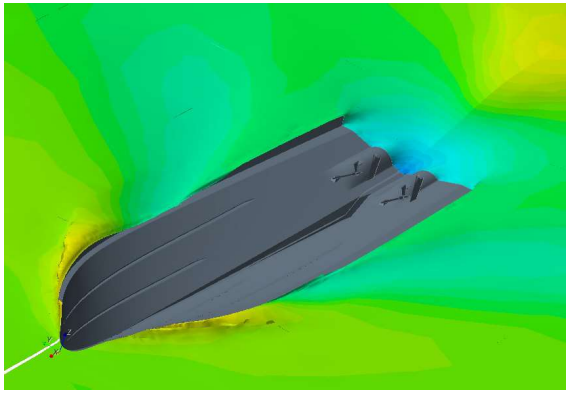

This Outback design delivers:
• An exceptionally low-resistance hull curve, reducing drag and improving overall performance.
• Minimal trim angle, keeping the boat level and stable at all speeds.
• Improved fuel efficiency and extended cruising range, thanks to the hull's ability to transition smoothly from displacement to planing modes.

Performance Highlights include:
• Twice the cruising speed of many 56' motor yachts with comparable horsepower, due to the hull's unique proportions and efficiency.
• Smooth transition to plane with a very small "hump" between 12.5–15 knots, thanks to an optimal speed/length ratio of 1.7–2.1.
• Long-range capability—the Outback 50 offers up to 1,200 miles of range, enabling serious coastal or extended cruising.

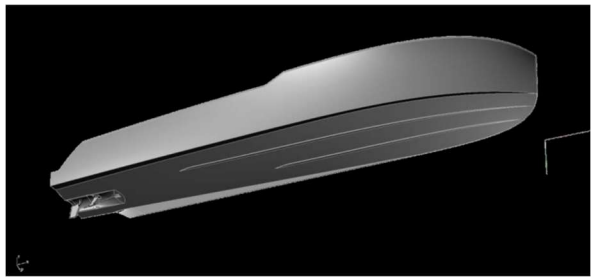

The Outback 50 delivers a rare combination of:
• Speed without sacrificing stability
• Fuel-efficient cruising across a wide RPM band
• A level, comfortable ride in real-world conditions
• The ability to cover long distances with confidence

This is a yacht designed not just to look good on paper, but to perform exceptionally in the environment owners actually use their boat.

Underwater view at 15 knots

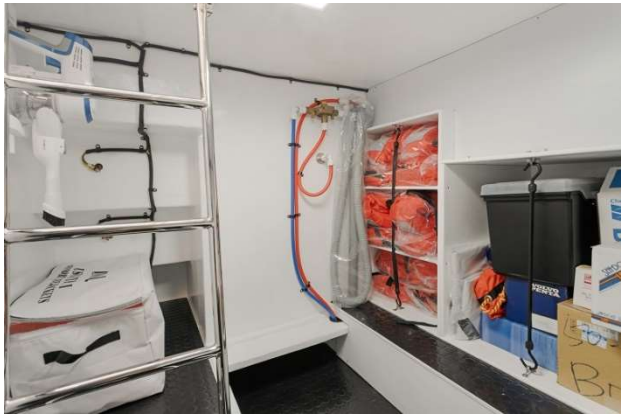

Well-Planned & Easy Access Machinery & Equipment Spaces

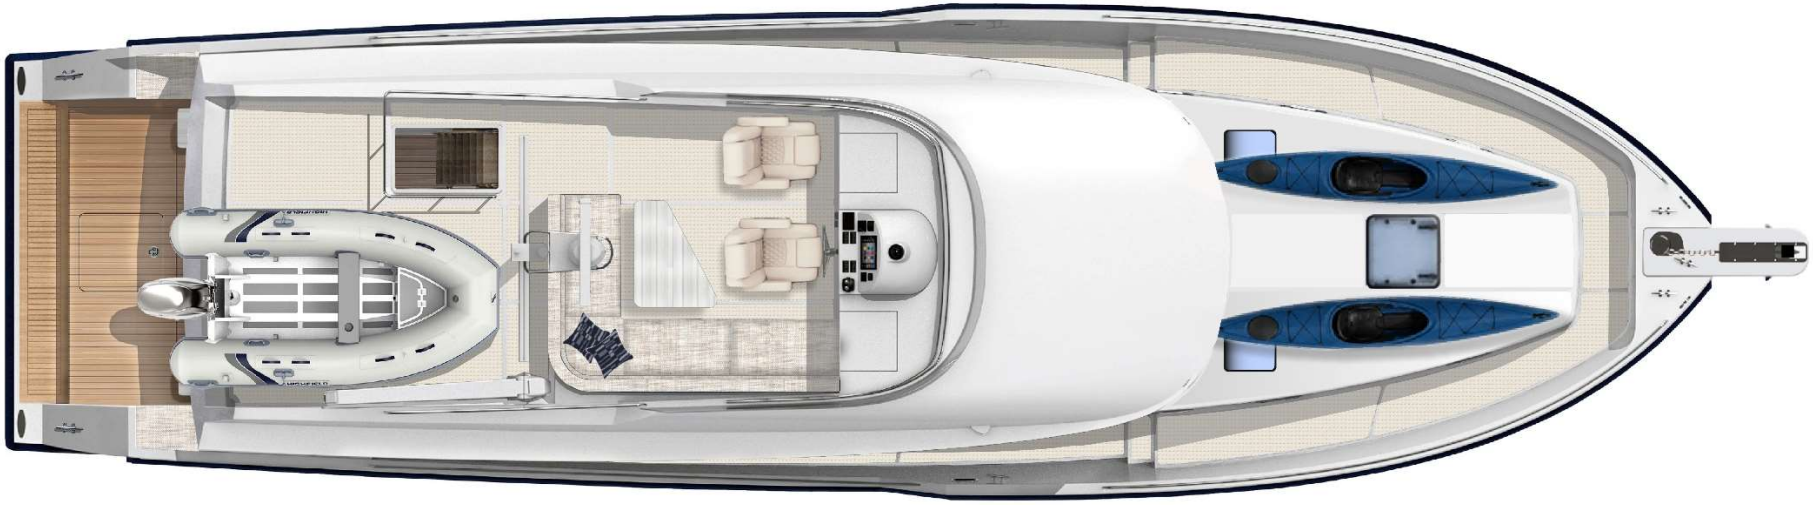

Engines are direct drive, easily accessible and are separated from the living area for quiet and comfortable running. Her utility/pump room is immaculate, well planned and very functional. For ship stores and long range provisioning, the storage room is the perfect solution.
